

NET Device Corp Receives Certification for ISO 13485 Quality System

MT. LAUREL, New Jersey – April 2, 2009 – NET Device Corp, a leading developer of medical devices for the treatment of drug addiction, today announced that the Company has received ISO 13485:2003 certification of its quality management system.

ISO 13485:2003 is the globally recognized standard which defines comprehensive quality management system requirements, specifically for the design, development, manufacture, and marketing of medical devices. Certification, by an accredited independent body, means the organization has demonstrated its ability to consistently meet customer and regulatory requirements.

“The ISO 13485 certification is another significant milestone for NET Device Corp in the provision of products for the treatment of drug addiction”, says Joe Winston, CEO, “and reinforces our commitment to the highest levels of quality across all of the Company’s activities.”

This ISO certification validates the reliability and effectiveness of the systems and processes which NET Device Corp has put in place, to ensure the safety and integrity of their proprietary NeuroElectric Therapy (NET™) products. The NET medical devices deliver non-invasive transcranial electrostimulation to treat persons addicted to nicotine, alcohol, cocaine, heroin, methadone, methamphetamines and other drugs and drug combinations.

About ISO Certification

The International Organization for Standardization ("ISO") is a worldwide federation of national standards bodies. ISO 13485:2003 certification is an international standard that specifies a quality management system for the development, production and distribution of medical devices and related services.

About NET Device Corp

NET Device Corp is the world’s leading innovator and provider of transcranial electrical stimulators for drug addiction. The Company develops, manufactures, and markets innovative, science-based NET medical devices that greatly ameliorate the undesirable acute symptoms of detoxification and substantially remove the long term cravings of individuals addicted to licit and illicit substances. Privately held NET Device Corp is headquartered in Mt. Laurel, NJ, USA, with subsidiaries in the UK and South Africa.
